Professional Summary

Software Engineer specializing in **DevOps**, with a strong focus on **infrastructure automation**, **CI/CD pipelines**, and modern practices such as **GitOps**. Experienced in **cloud technologies**, **containerization**, and **orchestration**, with a solid understanding of **scalable and reliable system design**. Also skilled in **full-stack web development**, capable of designing, developing, and deploying **end-to-end web applications** with seamless integration into **cloud-native architectures** and **automated delivery pipelines**.

Technical Skills

DevOps & Automation	Docker, Kubernetes, Jenkins, GitHub Actions, GitLab CI/CD, Ansible, Terraform, Kustomize, Argo CD, SonarQube
Cloud Platforms	Amazon Web Services, Microsoft Azure
Linux & Scripting	Linux Commands, Bash Scripting
Version Control & Collaboration	Git, GitHub
AI / Machine Learning	Machine Learning, Deep Learning, AI Agents
Programming Languages	JavaScript, TypeScript, Python, Java
Web Development	HTML, CSS, React, Node.js, Flask, OpenAPI, WordPress
Databases	MySQL, MongoDB, DynamoDB
Design & Architecture Tools	Figma, Lucidchart, Draw.io
Mobile Development	Flutter

Education

Sri Lanka Institute of Information Technology - *BSc (Hons) in Software Engineering* — Jan 2021 – Present

- **Key Coursework:** DevOps Practices, Cloud Computing, Software Development, Architectural Design, AI and Machine Learning, Data Structures and Algorithms, Database Systems, Web Development and more.
- **GPA:** 3.25

Ananda College, Colombo — Sep 2011 – Sep 2020

- G.C.E. Advanced Level (A/L) in Physical Sciences Stream (2 Cs, 1 S)
- Completed the G.C.E. O/Level examination with 9 A grades

Projects

AWS EKS Cluster Project with Full GitOps Automation

Infra Github Repo
Manifest Github Repo

GitOps-Based Kubernetes Infrastructure • DevOps Project

- Built a **production-ready AWS EKS cluster** following **GitOps principles** for automated application delivery.
- Implemented **CI/CD pipelines with GitHub Actions** to build and push Docker images for staging and production.
- Enabled **continuous deployment using Argo CD** to synchronize Kubernetes manifests with cluster state.
- Provisioned infrastructure using **Terraform** (VPC, EKS, IAM, networking) and deployed workloads via Kubernetes Ingress.
- **Technologies used** – AWS EKS, Kubernetes, Docker, Terraform, GitHub Actions, Argo CD

AWS-Based CI/CD Project with Jenkins and Terraform

Github Repo

Automated Deployment Pipeline • DevOps Project

- Designed a **CI/CD pipeline using Jenkins** integrated with GitHub webhooks for automated builds and deployments.
- Provisioned AWS infrastructure with **Terraform** and automated configuration using **Ansible**.
- Containerized services using **Docker** and enforced quality checks with **SonarQube**.
- Deployed applications behind **AWS Application Load Balancer** with Route 53 DNS and SSL.
- **Technologies used** – AWS, Jenkins, Docker, Terraform, Ansible, SonarQube

AWS-Based MLOps Pipeline

Backend GitHub Repo
Frontend GitHub Repo

Cloud-Native Machine Learning System • DevOps & MLOps Project

- Built a **cloud-native MLOps pipeline** for environmental sound classification using AWS.
- Trained and deployed models using **AWS SageMaker** with scalable inference endpoints.
- Exposed prediction APIs through **AWS Lambda and API Gateway**.
- Managed datasets and artifacts using **Amazon S3**.
- **Technologies used** – AWS SageMaker, Lambda, API Gateway, S3, Python, Docker

AWS Serverless Mini Game Project

Github Repo
Live App

Serverless Cloud Architecture • DevOps Project

- Designed a **serverless architecture on AWS** for a scalable web application with zero server management.
- Hosted a **React frontend on Amazon S3** and delivered globally via **CloudFront CDN**.
- Implemented backend APIs using **API Gateway and AWS Lambda**.
- Stored application data in **Amazon DynamoDB** and managed domain routing with **Route 53**.
- **Technologies used** – AWS Lambda, API Gateway, DynamoDB, S3, CloudFront, Route 53, React

Publications

Enhancing Environmental Awareness for Hard of Hearing Individuals: A Mobile Application Approach — Oct 2025

Proceedings of the Tenth International Congress on Information and Communication Technology (ICICT 2025), Springer Nature Singapore Pte Ltd

Springer Link

Certifications

Decoding DevOps – From Basics to Advanced Projects with AI — View Certificate

- **Concepts covered** – Linux, CI/CD, Docker, Kubernetes, Terraform, Ansible, AWS, GitOps, Monitoring & AI-powered DevOps tools

Docker and Kubernetes: The Complete Course from Zero to Hero — View Certificate

- **Concepts covered** – Docker containers, image creation, networking, Kubernetes architecture, deployments, scaling, security, and managed clusters

AWS Cloud Technical Essentials — View Certificate

- **Concepts covered** – AWS core services, IAM & security, EC2, Lambda, ECS, RDS, DynamoDB, and S3
